

THOMPSON CENTER HAWKEN .50 CAL. PERCUSSION, \$550

GUN TESTS RECOMMENDS: OUR PICK

A well made rifle with good metal-to-wood fit. The bluing is deep, and the metal well polished. While the barrel twist is in the middle of the road, this feature offers the round ball and bullet shooter the versatility of using one rifle.

SPECIFICATIONS

OVERALL LENGTH.....	46.0 IN.	TRIGGER.....	DOUBLE, SET
BARREL LENGTH.....	28.0 IN.	TRIGGER PULL WEIGHT UNSET.....	6.9 LBS.

WRIST CIRCUMFERENCE (MAX).....	5.25 IN.	WEBSITE OR EMAIL.....	WWW.TCARMS.COM.

The lock does not employ the traditional leaf-style spring, but rather uses a coil spring, which is faster and more reliable. Care should be taken to make sure the spring is cleaned regularly because this area collects fouling and can rust easily.

The rear sight is adjustable. It is a slight drawback for this rifle since it is not a traditional style rear sight, but it is functional. T/C also offers other sight options, including scope bases.
