

PFS Recommends

OVERALL, THE THREE MOUNTING SYSTEMS are completely different designs, and it could be said that each serves its intended market well.

In our view, however, the Warne Premier Series Lever Rings, which will cost more than \$130 to install, and the Leupold Quick Release Mount, which will set you back \$132, represent a higher standard of quality than the Weaver Detachable Top Mount. But if you're money conscious, the Weaver mount will only set you back \$65. Of the three, we think the Leupold exhibits the fewest problems and compromises and would be our pick as the top choice. This would be followed closely by the Warne system, and then distantly by the Weaver mounts.
