

## Picks

**WHILE THE** Nosler Partition Bullet in the Federal Premium brand remains a good selection for most hunting, it can't compete with other current offerings in terms of enhanced terminal performance, in our opinion.

The other three selections will serve you well, particularly if you match the bullet to the game. While we still do not have the perfect bullet in a factory load, we are getting closer.

In the meantime, we think hunters can take their pick of bullets from Swift, Barnes, and Winchester and hunt any thin-skinned big game with confidence.
