

# .357 Magnum

## Heavy Bullet Handloads

The following information is taken from the Speer Reloading Manual #12. Speer recommends these loads only be used in heavy-frame revolvers. The maximum overall cartridge length is 1.680 inches. All loads should use a very firm crimp to prevent bullet jump. Always start 10 percent below maximum and work up carefully in your particular gun.

Bullet: 200-grain Speer TMJ Silhouette, .357 diameter

<b>Powder Charge, Max.</b>	<b>Primer</b>	<b>Velocity*</b>
H110, 14.5 grains	CCI, magnum small pistol	1,392 fps
296, 14.0 grains	CCI, magnum small pistol	1,370 fps
