

REMINGTON MODEL 700VS VARMINT SYNTHETIC

Checkering wasn't supplied, nor was it needed

DuPont Kevlar composite stock has a one-piece aluminum frame and pillar-style action screws

The Remington shot 0.43-inch groups with Hornady V-Max 55-grain bullets

Remington experts can adjust the single-stage trigger

The 700VS's forend was rounded rather than square, which increased movement in the rest, we thought

Sling swivel studs were supplied, but the front stud should be removed for bench shooting
