

PSE F2 MAXIS

The \$169.99 F2 Maxis has a cast magnesium riser

The F2 Maxis had the heaviest draw of the three bows tested and shot the best velocities: at a factory-set draw weight of 72 pounds, the bow produced 244 feet per second with the huge hunting arrow.

The bow was not as quiet as the Bear

The PSE F2 Maxis was the best performer of the three bows tested. The model has been dropped from the PSE line but is still available through the company's custom shop.

Although supposedly shipped at 70 pounds draw weight, the PSE F2 Maxis tested at 72 pounds when drawn on a bow scale. All were adjusted to comparable weights before testing.
