

GOLDEN EAGLE FALCON FLAME

The sample offered an 80 percent let-off wheel that could be interchanged with an optional set of cams to provide 70 percent let-off

The Falcon Flame has Easy Draw wheels rather than high-performance cams

The grip was uncomfortable

We thought the bow was noisy

At a factory-set 68 pounds, the bow averaged a respectable 207 fps with the heavy arrow. That speed jumped to 222 fps at peak draw weight of 80 pounds
