

SLUG-GUN UPGRADES

An improved scope-mount system (like the Da-Mar set detail above) secures the optics

A high-comb stock from Bell & Carlson aids sighting

A ported barrel reduces felt recoil and muzzle jump

A Hastings 12-gauge cantilever barrel improves the Remington 870's baseline accuracy

A Hastings drop-in adjustable trigger allows the shooter to break shots more cleanly

Pinning the barrel (illustrated by the set-screw through the receiver of a Remington 1100 below) fixes the barrel location shot to shot.

Another stock option is adding a strap-on Monte Carlo trapshooting pad
