

FEG-BUDAPEST MODEL P9M 9MM, \$250

GUN TESTS GRADE: B+

An obvious clone of the Browning Hi-Power, the FEG was used but not abused. The barrel was absolutely like new inside, though badly marred by corrosion on the outside. The gun shot well with two of the four types of ammo, and was completely reliable. The wood grips needed to be refinished.

SPECIFICATIONS

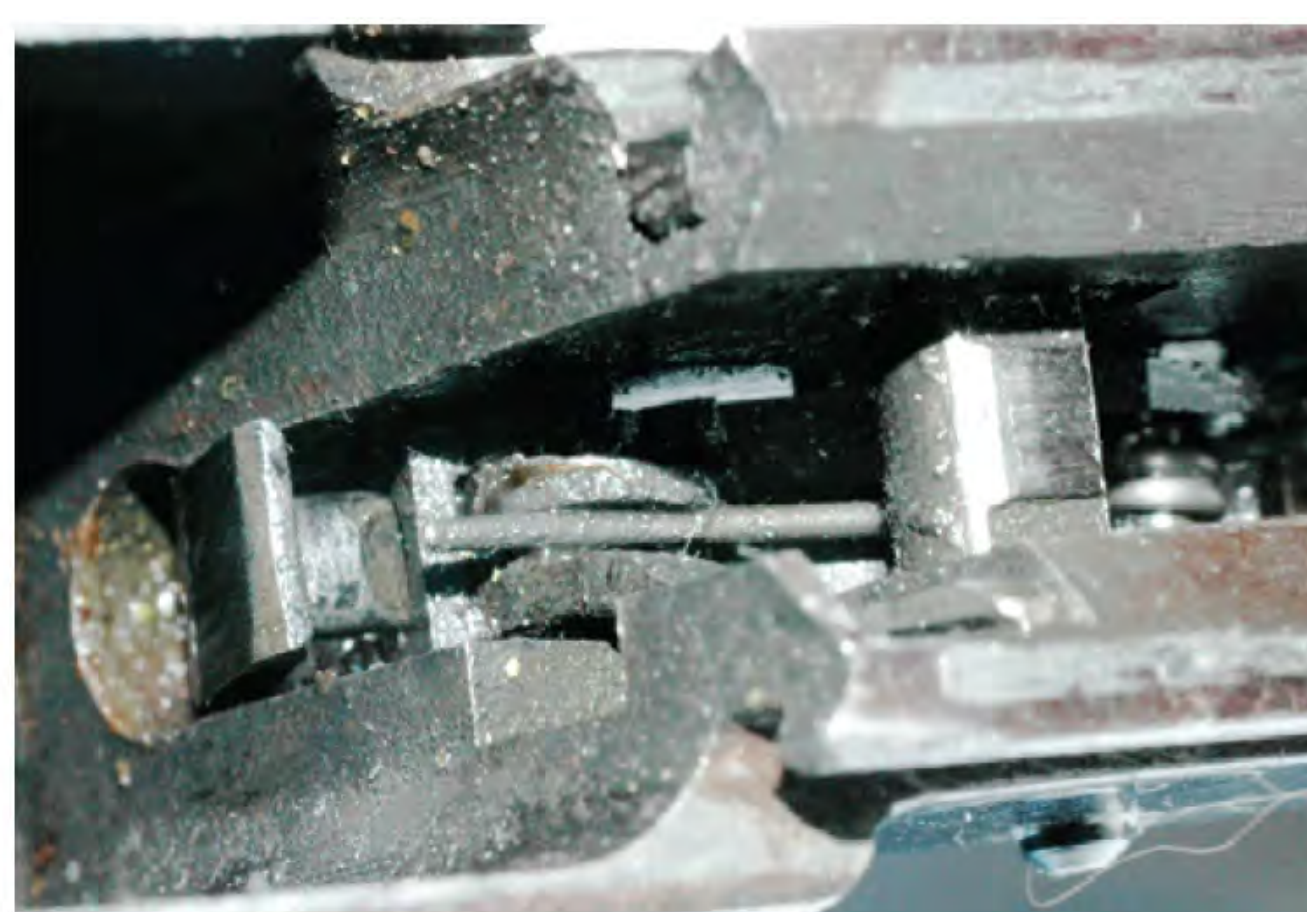

Overall Length	8.3 in.
Overall Height	5.1 in.
Barrel Length	4.7 in.
Sight Radius	6.2 in.
Front Strap Height	2.3 in.

Made in	Hungary

The dull-looking parts on the FEG's barrel breech were indeed rust.

Yet its inside was like new. This gun needed some care and good maintenance.

Left: There was lots of crud inside this Hi-Power clone. This is the trigger area.

Above: Simple takedown, by pulling the cross pin (arrow) when the slide is fully retracted, reveals the classic Browning design. Nothing new here, and excellent workmanship throughout. The trigger pull was horrid, though, and the magazine stuck.
