

**Right, and below: The Blocker IWB is among the most proven designs, and though relatively simple, it is effective. The sewn on J clip of the Blocker holster proved secure and takes a good bite on a leather belt.**

**Note the many options available on custom holsters and choose wisely. While this holster is single stitched, the choice of a sweat guard and J hooks on the Hopp holster are personal.**

**A holster is best considered a package. You must have a good leather belt for any holster. This Hopp holster features J hooks and a sweat guard.**

**This is a specially trimmed Hopp with loops and no sweat guard.**

**Holster making requires a certain art and a vial of sweat. This is the Hopp workshop.**
