

# SPRINGFIELD ARMORY XDM 45 XDM945BHC 45 ACP, \$709

## GUN TESTS GRADE: A-

A fun gun to shoot, we think the “M”-profile grip improves control.

**Above:** This is the XDM striker spring in its forward, relaxed position. The spring is brought to nearly full tension by movement of the slide.

**Above:** The XDM 45 utilized a long single-filament recoil spring. Note the overhang extending from the top of the barrel hood. Springfield Armory ignores this area and lists barrel length at 4.5 inches. But Sig Sauer includes this area in its measurement, listing the P250's barrel length at 4.7 inches.
