

GLOCK MODEL 41 45 ACP, \$775 GUN TESTS GRADE: A

The counter price for the Glock Model 41 was \$700. We thought it was a great all-round, go anywhere, do anything handgun. While it is long, it is not heavy, and it handles exceptionally well. Accuracy was good and the pistol was completely reliable.

The new G41 draws upon proven Glock operating principles. The Glock proved to be a formidable shooter.

The Glock 41 allowed a trained shooter to get back in operation very quickly by using the well-designed magazine release and tapered magazine.

Made In	Austria

If you want a tactical and practical 45 ACP with a light rail, the G41 is a great choice. The light rail sits at the front of a tapered section of the frame. The look is pleasing to the eye.

Left: This is the dual-spring recoil guide rod for the Glock 41. The Glock's recoil felt soft. However, after a long range session, all raters agreed it kicked more than the steel-frame 1911. But that's a simple function of weight.
